Product Specifications

What our clients are saying

"Our customers are raving about it! Since we went live with Red-Fork's mobile ordering service we have seen a definite increase in our pick-up and delivery business. The service has not only created new customers but also increased the frequency of our regular customer's orders. We are extremely pleased with the results that Red-Fork's mobile ordering service is producing and look forward to any enhancements they will roll out in the future." ~ **Anna Smith Honey Bear's BBQ**

Increase Order Accuracy

Provides Accurate and consistent orders, customers enter, review and place their own orders.

Easy-to-Use Interface

Red-Fork's clean and effortless interface guides patrons through a visual step-by-step process to place their order.

Brand-able

Brand-able templates allow each site to be unique to each business with custom fonts and images – no need for a web developer. This gives patrons a memorable experience as they are placing orders to the restaurant.

Mobile Ordering Benefits

Display the entire online menu on mobile phones, Smartphones, and tablets. This allows the patrons to place orders table-side, in meetings, on the road, picking up the kids or just sitting on the couch..

Search Engine Optimized (SEO)

Red-Fork has been designed to get your restaurant(s) noticed by displaying the restaurant location and menu at the top of Google, Bing and Yahoo searches. Attract new business by showing up first!

About Red-Fork Hospitality Solutions – Red-Fork Mobile Ordering is a mobile and kiosk application that allows patrons to view any Red-Fork Network restaurant's full menu. The patrons can view the menu and place orders for pick up, delivery, or dine-in. They can even pre-order days in advance, giving them greater flexibility and convenience. **Mobile Ordering Made Easy!**
